

Sachin Singh

7041200380 | rajeshsachin786@gmail.com | Prayag Raj, Uttar Pradesh

PROFESSIONAL SUMMARY

Senior Full Stack & AI Backend Developer with 7+ years building scalable production APIs and SaaS platforms. Hands-on expertise in Generative AI (OpenAI, Groq, RAG pipelines, Pinecone), System Design (microservices, event-driven architecture, caching, load balancing), and cloud infrastructure (AWS). Delivered 5+ live production applications across e-commerce, healthcare, education, and AI SaaS. Strong ownership, client communication, and end-to-end delivery track record.

KEY ACHIEVEMENTS

- Built AI Resume Coach SaaS — production platform handling 1,000+ AI interviews/month with OpenAI + Groq LLM pipeline, deployed on AWS Amplify.
- Reduced AI token costs by 50% through prompt compression, answer truncation, and intelligent LLM routing (OpenAI to Groq fallback).
- Delivered 5+ live production applications (Seekrz, Cellcast, Austin Indian, Speech Therapy App, AI Interview Agent) across 3 companies.
- Implemented RAG pipeline with Pinecone vector DB achieving context-aware personalized question generation from candidate resumes.
- Integrated 4 payment gateways (Stripe, ACH, Apple Pay, Cash Pay) in a single production application with zero downtime.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Next.js 16, Express.js, REST APIs, GraphQL, Python (Basic)

GenAI / LLM: OpenAI GPT-4o, Groq LLaMA-3.3, Prompt Engineering, RAG, Pinecone, LangChain, Embeddings

System Design: Microservices, Event-driven Arch, API Gateway, Load Balancing, Redis Cache, Message Queues, DB Sharding

Database: PostgreSQL, MongoDB, Prisma ORM, Redis, MongoDB Aggregation Pipelines

Cloud / AWS: S3, SNS, Amplify, RDS, EC2, CloudWatch, IAM

Auth: NextAuth.js, JWT, OAuth (Google), OTP (AWS SNS), bcrypt, RBAC

Payments: Stripe (Subscriptions, Webhooks), ACH Direct Debit, Apple Pay, Cash Pay

Frontend: React.js, TypeScript, Tailwind CSS

DevOps: CI/CD, Docker, Git, GitHub Actions, Terraform, Kubernetes

Other: WebSockets, Cron Jobs, Webhooks, Twilio, Proctoring Systems, Real-time Communication

PROFESSIONAL EXPERIENCE

Moon Technolabs | Ahmedabad

Senior Full Stack & AI Developer (GenAI + System Design) 07/2023 – Present

AI Resume Coach & AI Interview Agent | GenAI SaaS Platform

- Architected AI Resume Coach — production SaaS on AWS Amplify; multi-tenant PostgreSQL schema, RBAC, Stripe billing (Free/Pro/Enterprise), webhook integrations, and GDPR compliance.
- Implemented RAG pipeline: resume text chunked, embedded via OpenAI text-embedding-3-small, stored in Pinecone vector DB — enabling context-aware personalized interview questions.
- Applied GenAI across 6 features: interview question generation, real-time follow-ups, feedback scoring, ATS resume matching, STT spelling correction, and Text-to-SQL natural language DB queries.
- Integrated OpenAI GPT-4o-mini (primary) + Groq LLaMA-3.3-70b (auto-fallback); built real-time AI interview engine with STT, TTS, voice auto-submit, and AI proctoring system.
- Contributed to AI Interview Agent — backend APIs for AI-driven sessions, candidate evaluation workflows, and automated LLM-based feedback generation.
- Built bulk campaign system: CSV import, candidate comparison, recruiter notes, interview retake, S3 audio recording; optimized token usage by 50% via prompt compression.
- Tech: Next.js 16, TypeScript, PostgreSQL, Prisma, AWS (S3/SNS/Amplify/RDS), OpenAI, Groq, Pinecone, Stripe, NextAuth.js.

Seekrz, Austin Indian & Speech Therapy App | Node.js / NestJS Projects

- Led entire backend architecture for Seekrz — live mobile app on App Store & Play Store for users and store owners across multiple locations.
- Designed trade offer feature with cron job automation (auto-cancel after 48 hours); implemented Stripe, ACH direct debits, Apple Pay, and Cash Pay payment integrations.
- Developed bulk order functionality ensuring high-performance API responses under heavy loads; built notification systems and user/store authentication.
- Contributed to Austin Indian — community platform for Indians in Austin, Texas; developed complete backend APIs for restaurant search and filtering.
- Built backend APIs for Speech Therapy Medical Application using NestJS — secure patient data handling, appointment scheduling, and session management.

ManekTech | Ahmedabad

Software Engineer (MERN Stack) 11/2021 – 05/2023

- Led backend development for Cellcast (Australia) — bulk SMS communication platform; built APIs handling high-volume SMS campaigns with reliability and delivery speed.
- Integrated Stripe Payment Gateway for top-ups and subscription billing; designed SMS credits, user balances, and transactional logging systems.
- Collaborated with cross-functional teams; participated in client calls to gather requirements and deliver optimal backend solutions.
- Applied backend optimization strategies to reduce costs and enhance platform scalability.

Crest Infosystems Pvt. Ltd | Surat

Software Engineer (Node.js) 01/2021 – 10/2021

- Built online course platform from scratch using Node.js — APIs for course management, mastermind modules, agency features, and Facebook-based revenue integration (Udemy model).
- Developed JWT-based authentication, Twilio SMS integration, Node-Cron scheduling, and MongoDB Aggregation Pipelines for complex data operations.

EbizzInfotech Pvt Ltd | Surat

Software Engineer (Node.js) 01/2019 – 12/2019

- Designed and developed scalable backend APIs; conducted data analysis, retrieval, and indexing to support business logic and enhance user experience.

Dronstudy Pvt Ltd | Delhi

Junior Software Engineer 01/2018 – 12/2018

- Built RESTful APIs using Node.js for live class functionality — smooth streaming and real-time communication; collaborated with front-end teams for seamless integrations.

PERSONAL PROJECTS

AI-Powered HR Policy Assistant — FastAPI · LangGraph · OpenAI GPT-4o-mini · Pinecone · Next.js 14 · Tailwind CSS · Docker

<https://hr-policy.rasuonline.in/>

- Built a production-ready AI-powered HR Policy Assistant that answers employee queries using company policy documents with high contextual accuracy.
- Implemented Agentic RAG with automatic query rewriting and document grading — the agent retries retrieval with improved queries when results are irrelevant, significantly improving answer accuracy.
- Deployed full-stack application on Render (backend) + Vercel (frontend) with Docker containerization.

AI Prompt Optimizer — Next.js 15 · TypeScript · OpenAI · Anthropic · Google Gemini · LangGraph · Redis · BullMQ · PostgreSQL · Prisma

<https://token.rasuonline.in/>

- Built a web app that analyzes, compresses, and optimizes long LLM prompts to reduce token cost while preserving prompt quality and intent.
- Implemented Server-Sent Events (SSE) for real-time streaming progress updates during multi-step optimization workflow.
- Integrated Redis + BullMQ for background queue processing and PostgreSQL + Prisma for prompt history and cache persistence.

- Supports multiple AI providers (OpenAI, Anthropic, Google Gemini) with LangGraph-style multi-agent workflow covering prompt analysis, compression, and review stages.

EDUCATION

Bharati Vidyapeeth | Pune

MCA — Master of Computer Applications 2017

- Awarded for Outstanding Performance in Cricket; balanced academics and extracurricular activities effectively.
